*\*business / community group / team / social enterprise  
community / family*

**Even if you have no idea what a Syntropic Project is**, this is your onramp to a system for regeneration that works.

This workshop teaches you the essential ingredients for collaboration using language easily shared with your team.

**Perfect for anyone with a daring or important project. Especially if you want to attract amazing, values-aligned humans into your mission.**

**Collaborative teams in harmony are powerful.**

The collective brilliance cannot be predicted.

**Diversity is essential,**  
yet too much will cause friction.  
Too little and innovation is smothered.

When we **create work for a world with a future,**  
team and partner dynamics will make or break.

The Trust Manifesto Makes,  
and if there are Breaks, reparation is built in.

Understanding the essential ingredients to create  
ecologies of synergy means **you can apply these  
skills to projects, large and small, forever more.**

I'm excited to share the best of **my thirty+ years of  
coordinating humanity to bring out its best.**

You will **learn the Sourcecode behind human  
relational design,** *meet wonderful people,* and  
produce a Trust Manifest that will serve you and your  
people in ways you couldn't have imagined.

**- Christine McDougall**

# About the Teacher

**Christine McDougall is an Australian founder, speaker, and writer who is best known for her work on Syntropic World. Syntropic World is a global education platform, community and incubator based on a set of practices to create regenerative systems and societies that are in harmony with nature.**

Christine believes the current economic and societal systems are not sustainable and a new approach is needed to create a world that is in balance with the environment and fosters human flourishing. *Syntropic World is based on the principles of Syntropy, which is the tendency towards order, coherence, and life. It is deeply inspired by the work of R. Buckminster Fuller.*

**The *Trust Manifesto* is a powerful template first applied in 2015** to a multi-stakeholder event held on the Gold Coast, Queensland, Australia. It enabled a team of 12 strangers to co-create the event over six months without a single upset and entirely self-managed. **Since then, it has been used by teams worldwide to create ecologies of synergy, unleashing the greatest exponential technology we have available to us - human minds working together synergistically within a context of wisdom.**

In a world fractured by polarisation and propaganda, synergistic teams and elegant human coordination are more critical than ever.

Christine has discovered the essential, repeatable ingredients to ensure your team and community are synergistic.

# What people say

"You are a great teacher Christine – gritty, savvy, sage, tenacious - an inspiring role model."

- Jane Sydenham Clarke

"I am a very visual person so love seeing the diagrams and theories. I also love Christine's style of very clean, clear communication and living her own values. I can sense her integrity and also see it in each class."

- Laura Blundell

"The best thing about the Syntropic Enterprise Masterclass was being able to step into a very human, supportive space, and explore, and start applying really powerful ideas. The work has such wide applications (the transformation of humanity no less) but it starts with the personal, so the safe space for raw, honest sharing was essential and very much appreciated."

- Will Tait

"Just the feeling of being grateful- it doesn't come easy or cheap these days - for reaching and finding myself in a community where the sense of belonging and truth prevails."

- Solomon Felous

"Your vulnerability and passion to serve are rare qualities that usually don't get expressed so openly by someone who is providing training and education. And as I said before you're down to earth use of the language is exhilarating."

- Chuck Tomaselli

"Christine is incredibly inclusive, authentic, and responsive. This level of "real" combined with such a well-planned and structured program made for a very personal experience. Felt very much a part of the cohort, and while we were all different, it felt that we were all valued."

*- Kery O'Neill*

"It was an amazing experience in a safe and supportive environment with wonderful participants. It was also challenging both in terms of absorbing integrated concepts and confronting one's own thinking and behaviours. A unique and uplifting experience!"

*- Cullum Francis*

"Love love love the content. It's exactly what I've been looking for and finally explains enterprise structure and so many of the finer elements we need to be aware of when manifesting a source idea."

*- Manuela Damant*

"Before I joined the Syntropic Community I often wondered if people were right when they told me I was being naive and unrealistic. I tried to change the organisation I was a part of but it just exhausted me and didn't really yield the results I wanted to see. Then I decided to stop trying to change them and instead try and build something new, in a way that I believe is right. Christine and the Syntropic Community have given me clarity, validation and practical tools to help me do exactly that! As soon as I stopped being alone in this and instead found allies for the journey, I switched from naive and unrealistic to inspired and idealistic."

*- Sandra Winterbach*

"This work resonates so deeply with what I know in my bones and how I want to operate in the world. It is what all my career coaching clients are looking for in their careers and employers, and it's built on solid deep, profound time-tested principles."

- Colleen Reichrath-Smith

"Christine McDougall is a leading visionary on how to create enterprises that operate in a world with a future. Through Syntropic World, new Syntropic Enterprises are being born based on the new models that create a better world for Earth and all her creatures. Christine is leading where no one else is operating - yet. Christine has dedicated her life to working with a Syntropic community to develop these models. These models are based on laws inherent in nature - as the intelligence embedded in nature far transcends human intelligence. Meeting Christine and taking her Masterclasses has truly changed my life trajectory - and for that, I am truly and forever grateful."

- Marianne Wyne

"Christine is as lucid and compelling as the Syntropic framework she has stewarded into this world. She is a manifestation of the courage that it takes to refuse to compromise integrity of purpose as well as of the astonishing power this brings, in terms of both personal development as well as the potential for the evolution of a higher order of principles to guide businesses, organisations and humanity away from the precipice towards regeneration. "

- Cindy Forde

"After I did the Synergistic Accounting Audit, led by Christine, I started to look at my own small-scale economy differently and became more aware of what I can change with simple things in my own little environment. It works like a stone in the pond of change. A new horizon opened up based on Christine's unique approach. If you take the world and yourself seriously, this is A Must Do!

You continue to astound me with your deep insights. You truly are one of Bucky's most brilliant heirs. Your mind is amazing. Thank you so much for continuing to express yourself so clearly. You are a light in the dark that surrounds us in space and time."

- Cherie Clark

"Christine's style of teaching is very hands-on, requiring input from participants that illuminate the practical application of the processes she is teaching about. The demonstrations with real-world examples made sense of what we were learning and she was amazing how she handled multiple scenarios and had deep experience in handling any manner of situations"

- Rachelle Armstrong

# Mini-Deep Dive

## What is a Trust Manifesto?

Don't worry if there's a lot here. We will run through this in the first Workshop. But in case you really can't wait.

A Trust Manifesto is an **agreement enabling an ecology of Trust.**

It ensures:

- People make an informed choice about their participation in the Project\* before they become active participants.
- The Project's purpose and values are defined and a code of conduct enables people to bring their full agency to the Project while working collaboratively.
- Synergy - where the collective brilliance far exceeds any one contribution.
- Personal and Team Development is paramount to success
- Accountability and responsibility are natural outcomes.

\*business enterprise/community group/team/social enterprise

- Polarity is built in by design so that the enterprise maintains its shape and integrity. This includes healthy diversity.
- The Trust Manifesto provides the threshold-crossing agreement that enables the enterprise to be a living, dynamic system.
- The project has flow science (optimal performance) built into its DNA.
- Good times!

### **Without a Trust Manifesto, expect the following.**

- Broken partnerships
- Entitlement
- Lack of accountability or responsibility
- Lack of commitment
- A huge energy drain dealing with dysfunctional human dynamics
- Unmanaged expectations
- Blame, victim, and bullying behavior
- Disrespect and lack of emotional safety
- Undermining, gaslighting, power games
