## ON CHRISTINE'S WORK & IMPACT

“

*After over 30 years working directly on systems change, Christine's work is the most powerful I have encountered. If only a fraction of the energy that people direct into the industry that is now CSR was applied to building syntropic enterprise, I truly believe we would exponentially increase our survival odds as a human family.*

*Christine McDougall is a leading visionary on how to create enterprises that operate in a world with a future. Christine is leading where no one else is operating — yet. **Marianne Wyne**

COO, Planetary Care

“

*I have been following the wisdom of Buckminster Fuller, Integral Theory and Spiral Dynamics for many years. Yet, as a recent graduate of the Syntropic Enterprise Masterclass, I've found for the first time this wisdom combined in a unique and powerful way. There's a powerful current emerging of syntropy coalescing into organisations that both do good and do well for the whole of life.*

## ON THE SYNTROPIC ENTERPRISE MASTERCLASS

“

*As a recent graduate of the Masterclass, I feel as if the path forward — in my business, my life, and the world — is suddenly clear, and that a planet with a beautiful future is entirely achievable. There's a powerful movement afoot, and I feel honoured to be part of this vibrant community of practice.*

**Robyn-Lee Ghau**

“

*It's kind of like having the universe help you build your business. You learn more in two days about what is really needed to transform business than you do in a two-year MBA.*

**Jacob Isenberg**

“

*I don't think anybody serious about building a business fit for the challenges of our times can afford not to understand the principles offered by the Syntropic Enterprise Masterclass.*

**Cindy Forde**

“

*Before I joined the Syntropic Community I often wondered if people were right when they told me I was being naive and unrealistic. Christine and the Syntropic Community have given me clarity, validation and practical tools to help me do exactly that. As soon as I stopped being alone in this and instead found allies for the journey, I switched from naive and unrealistic to inspired and idealistic.*

**Sandra Winterbach**

“

*The Syntropic Masterclass serves as the fulcrum on which the world tips — away from the proverbial cliff edge towards regeneration and restorative systems. The masterclass offers a compelling vision and toolkit for steering us away from that cliff edge. It is a lighthouse for all those daring enough to navigate towards a better future.*

**Kimberley Wilson**

“

*Incredibly well researched in its relevance and practical application. The workshop became a game changer for me because it inspired me to nourish clean, lasting connections and relationships and see how many new opportunities these bring.*

**Aurica**

“

*The world needs the Dare to Care style processes to be infiltrated in all areas of human relationships. Far too much time is wasted on earth being caught up in our own heads rather than having the courage to undertake clear and caring communication.*

**Chuck Tomaselli**

## ON SYNERGISTIC ACCOUNTING

“

*As a Chief Financial Officer with over 15 years experience within ASX listed companies, I have now applied Synergistic Audit principles to a client's business. The amount of energy this process is unlocking cannot be defined in my humble words. To say the business is taking a new holistic breath of air together feels like the next stage of growth is coming from a deeper sense of shared values. As a finance professional I am inspired to take these principles much further into the business community.*

**Paula Kensington**

Business Strategist, Advisor & Mentor, Sydney

“

*The richness of diving deeper into my own world through the Synergistic Accounting exercise was confronting and freeing at the same time — ultimately putting together a string of unexpected words. A relief that I hadn't drifted too far away from who I am and who I want to be.*

**Paul Epping**

Synergistic Accounting Graduate

“

*A modest investment with measurable returns. It makes you think about your enterprise in a very different and more holistic way, and it connects you with a likeminded community.*
